

QN206/212

Current Transformers

The QN206/212 are current transformers used with DigitroniK temperature controllers to monitor load current.

These transformers initiate an alarm signal on partial failure of parallel-connected heating elements, and on total failure of series-connected elements.

DIGITAL CONTROLLERS

Specifications

Item	QN206A	QN212A
Detecting current	0 to 50A (r.m.s.) 50/60Hz	0 to 200A (r.m.s.) 50/60Hz
Internal resistance	39 ± 3Ω	27 ± 3Ω
Ambient temperature	-10 to +75°C	-20 to +75°C
Mass	Approx. 10.5g	Approx. 55g

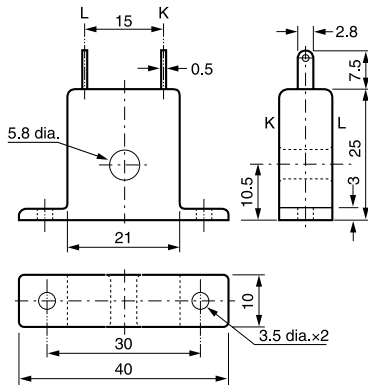

Selection Guide

Model No.	Description
QN206A	Current transformer, 0 to 50A (r.m.s.) 50/60Hz
QN212A	Current transformer, 0 to 200A (r.m.s.) 50/60Hz

Dimensions

(Unit: mm)

• QN206A

• QN212A
